1. teamwork.com

- **Description**

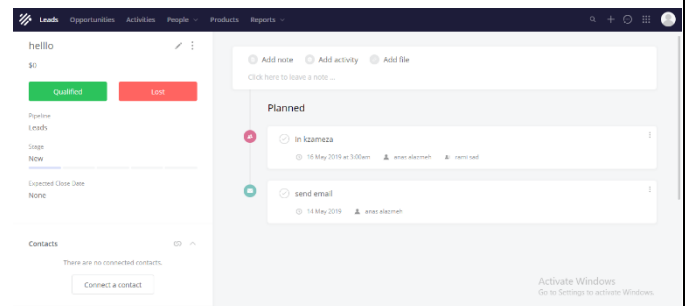

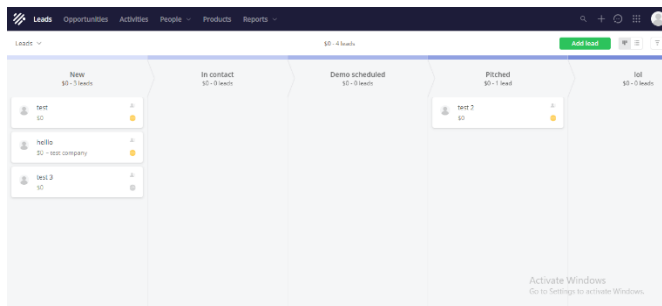

Teamwork is Website has three parts, first part is CRM (Customer Relationship Management), second part is project management and third part is chat;

- **CRM**

User can manage order in category like board and every order has product or activity or appointment (meeting, call, email...) can assigned to user, company or contacts.

User can:

- I. manage company
- II. manage product
- III. manage contacts
- IV. filter activity
- V. save filter with name
- VI. view activity in time line

- **Project management**

The home page is customer dashboard can change chart and report.

in every project has overview of project and a lot of sections(tasks, milestones, message, files, time, notebooks, risk management, links)can hide and view when create the project and can create channel chat relation with project.

- a. **Tasks:**

There are two type of tasks first type general task with list view and collapse and the second type is board and card style.

Every task has:

- I. date for start and end
- II. assign to user
- III. follow or not the task
- IV. log time for task
- V. comment like editor and select user

- b. Milestones
User can add milestone and put in it multi-card from a task, set finish date and mark to a reminder in an email before 24h.
Calendar view to sample show all milestones
 - c. Timers
To view all time logs or add new time log is not for any task
 - d. Files
To share files in project
 - e. Notebooks
To add formal decision in project
 - f. Risk
To add risk to project and probability of risk source happening, Impact on the project if the risk source happens.
 - g. People
Can add member to team and create role in the project
 - h. Rate
Rate user in this project
- Chat
User can make chat with user only or in group with react on message and upload file

2. Monday

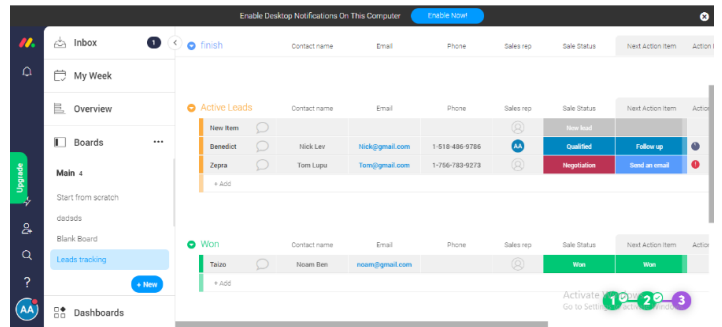

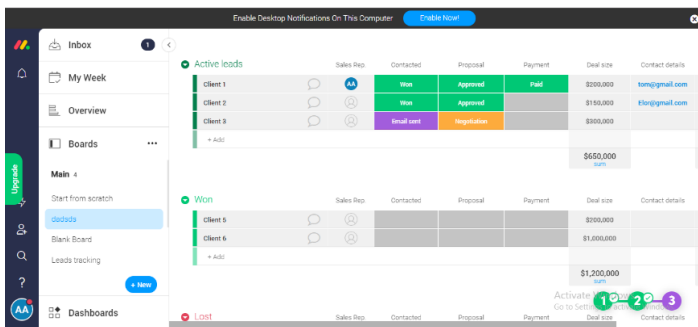

- Description

Monday is a website just to manage tasks in a project but not project management.

The board of view tasks depend on a project type (design, program, learning ...) and dynamic in column and row, every task has comments and checklist and can add column with type.

Every user has time line for this week.

The dashboard is dynamic in everything (widget, data, placement ...)

3. ZOHO

- **Description**

A website to manage tasks, team, milestones and time with a simple calendar.

The project manager can add a game to game scope (the game is like a challenge).

The log of all module is good thing
